PROFESSIONAL SUMMARY

Developer at Fabrikam since 2020 building internal tools and data pipelines on AWS with Python and Terraform. Built Tidepool (tidepool.example.com), a weekend project with a few hundred users. Holds a Bachelor's degree in Information Systems. Bilingual: English, Spanish.

WORK EXPERIENCE

Senior Developer · Platform Engineer · Technology Analyst 2020 – Present

Fabrikam | Austin, TX — Internal Tools & Reporting

- Build and maintain internal workflow applications in Django and Python on PostgreSQL for the service desk.
- Use Terraform to build application infrastructure as code on AWS: databases, networking rules, ECS and Lambda functions.
- Tools: Python, Django, SQL, PostgreSQL, AWS (Lambda, ECS), Terraform, GitHub Actions, Grafana, Git

Support Analyst 2016 – 2020

Tailspin Toys | Austin, TX

- Answered 40 support tickets a day and wrote SQL reports for the operations team.

Interpreter 2010 – 2012

Example Language Services / Contoso Linguists (CLS) | Springfield, IL

- Interpreted English and Spanish for clinics and schools.

PROJECTS

Tidepool — Personal Project (Weekends) 2024 – Present

tidepool.example.com | Tide-tracking app

- Built and shipped a tide-tracking app in TypeScript and React on Supabase (PostgreSQL) and Vercel.
- Integrated public weather and tide APIs and designed the landing page in Figma.

EDUCATION & CERTIFICATIONS

Kubernetes Administrator Certificate, 2024
Example Learn: Cloud training badges
Cloud Practitioner, 2022
Data Science (M.S.), 6 hrs credit — Lakeside State University, Austin, TX, 2022
Web Development Bootcamp — Example Coding School, Austin, TX, 2016
Computer Science (B.S.), 45 hrs credit — Riverbend State University of Applied Technology, Dallas, TX, 2012 – 2014
Bachelor's in Information Systems / Software Engineering — Northgate Technical Institute, Springfield, IL, 2006 – 2010

SKILLS

Languages & Frameworks: Python, Go, SQL, Bash; TypeScript/JavaScript and React (internal dashboards and admin panels)
Data & Reporting: Grafana (dashboards), PostgreSQL, SQL, Excel/VBA, data visualization
Platforms & Cloud: AWS (Lambda, ECS), PostgreSQL, Supabase, Vercel, Azure (App Service, Functions), Terraform (infrastructure as code), GitHub Actions (CI/CD), Power Platform (Power Apps code apps & canvas apps, Dataverse, Power Automate, Copilot Studio, Pipelines), Git, Jira, Figma
Working knowledge: Docker, Kubernetes, Google Cloud
